

GREETINGS:

Get ready for life to move forward tomorrow as the last planet (Mercury) that has been restrained by retrograde motion, moves back into action, allowing the door to the crossroad of life to open as February becomes a journey to the heart. It is time to make decisions, settle unsettled matters and repair all the electronics and details in your life. As you may remember, February began with a New Moon in Aquarius, beginning the Lunar New Year of the water TIGER. We can all proceed with determination and confidence as we focus on connection to others, improving our finances and adding **enJOYment** back into our lives. Venus and Mars, the planets of love and connection travel together (a rare occurrence) most of February, finally separating in early March as they move from Capricorn into Aquarius on **3/7**. On **2/8** Mars, the mover, and Uranus, the shaker, form a trine in earth signs Capricorn and Taurus respectively, bringing a break from whatever the normal has been. This is a time for a motivated breakthrough. On **2/5** the Sun and Saturn join together for their annual embrace, increasing our need to commit, to apply more discipline to our lives and take greater responsibility in our lives. In other words: function as an adult with no more excuses. Here are the major aspects for February:

VENUS AND MARS, OUR PERSONAL PLANETS OF ATTACHMENT JOIN TOGETHER ON FEBRUARY 16:

In mythology Venus was the female goddess of love and Mars was the male god of war. When they join together, sparks fly and relationships explode with possibility and opportunity for regeneration. Say “yes” to all opportunities to connect with new relationships and creative endeavors as this pattern remains strong until **3/7**. With all of the personal and transpersonal planets moving forward the only limitations we may encounter are self-induced. On **3/3** Venus and Mars join with powerful Pluto to bring about a powerful transformation in our relationships. It will be easier to be clear about our needs and what no longer serves us.

FULL MOON IN LEO (FEBRUARY 16)

One day after Venus and Mars embrace, the Full Moon in Leo urges celebration and channeling your inner King and/or Queen energy, if possible, in the company of others. The Leo Full Moon brings a natural sense of drama, offering the

opportunity for entertainment, desire and enjoyment. The Moon in Leo, especially when it is a Full Moon, unleashes passion, creativity, confidence and can for some make them swagger like a peacock. Enjoy the only Full Moon in Leo for 2022. This moon is ripe with strength, energy and passion.

PISCES SEASON BEGINS ON FEBRUARY 18

The Sun enters Pisces opening the door to the Pisces season. We will all have more opportunity to feel, dream, imagine and enjoy the intuition of the right hemisphere of the brain soaring as the Sun moves toward Neptune, the ruler of Pisces on **3/13**. This begins a period of flow without restraint if you don't resist the movement forward.

A STELLIUM OF PLANETS BIND TOGETHER IN CAPRICORN

The term "stellium" means 3 or more planets are in the same sign, intensifying the energy that emits from the sign. In this case, it is an amazing group: Mars, Venus, Moon and Pluto. From **2/16-3/3** the personal planets align together to enter the domain of Pluto, ruler of profound change, drama and the Shadow in ourselves and in our lives. At this time anything is possible. Plan accordingly and live your best life. Eliminate what no longer serves you and move forward with a leap of faith. We are all at a crossroad as we move forward. This is a time of profound transformation with a strong emphasis on love.

WISHING YOU A MONTH OF LOVE, LIGHT, PEACE, PASSION AND PROFOUND CHANGE WITH AMAZING GRACE,
