

February 2023 Astrological Outlook

GREETINGS AND WELCOME TO FABULOUS FEBRUARY:

February is the shortest month, but this February we will have the opportunity to move forward without restraint for the first time in 11 months. From April 2022-January 2023 the planets were playing bumper cars with our lives. Finally, February and March 2023 provide a full speed ahead growth plan if we are bold and have a good plan for transformation. February bursts forth with a Full Moon in Leo on **2/5**, with Mercury coming out of his shadow on **2/7**. This begins an open season for change, growth, and transformation for those who are prepared to dream and visualize a period of unlimited self-realization. February is a transformational month in a transformational year.

2/1 – 2/17 is still part of the Aquarius season which began with the New Moon in Aquarius on January 21, 2023. Aquarius is associated with technology, innovation, the future, friendships, and the collective. Ruled by the Water Bearer, Aquarius energy is also a symbol of the flow of energy between human beings, the invisible attachment energy that attaches us to others. As an air sign, we are awakened to the potential for choice and change, moving beyond rigidity and the past, into the possibility of awakening to life and move forward. Aquarian energy often begins as chaos which turns into creative brilliance. On **2/3** the Sun in Aquarius squares off with the planet Uranus, the planet that rules Aquarius, opening the door to the change period that will begin in March 2023.

MAJOR ASTROLOGICAL TRENDS IN FEBRUARY:

FULL MOON IN LEO ON FEBRUARY 5:

The Moon in fiery Leo opens our hearts and minds as it is intensified by its connection with Uranus, intensifying innovative thinking and unlimited passion and drama. This is the time for unexpected inspiration while we turn up our passion and desire. This Full Moon is the 5th of 7 Full Moons at the same degree of a sign, which is moving to close a chapter in our life, so we are ready for the major changes in March. A switch is being flipped that will end some associations with others and reconnect us with those we are more compatible with. The day before the Full Moon Venus, now in Pisces, will form a stimulating pattern with Mars, still in

Gemini, that may direct us toward a more satisfying relationship with ourselves, and therefore others. Time for greater clarity and acceptance.

FEBRUARY 10-16: A PERIOD OF GREATER CLARITY:

After the Full Moon in Leo (**2/5/23**), Mercury joins Pluto in Capricorn for the final time. Since 2008 Pluto has positioned himself in Capricorn, which has brought havoc to the political and financial issues of our time. Pluto has a 240-year orbit, returning to its point of origin. In March 2023, Pluto begins his slow movement out of Capricorn into Aquarius and will be going back and forth from Capricorn and Aquarius. Mercury is our thinking system and when Mercury and Pluto dig deep together for the last time, who knows what we will discover. Since Mercury is a personal planet, if you are troubled by anything in your life, **2/10** is a great day to find someone to talk to who has a different perspective, particularly about business and finance matters. On **2/15**, Venus joins Neptune in Pisces for a romantic, creative partnership. Since this occurs the day after Valentine Day, it portends a peaceful, loving feeling. Finally, the Sun in Aquarius joins Saturn in Aquarius for the last time until 2050. The 3 years that Saturn has been in Aquarius have been full of limitation, difficulty, chaos, and of course, innovation and change. Say goodbye to all that has occurred and make a list of the gifts this 3-year period has brought into your life. This is a great day to update your goals. **CHANGE IS COMING IN MARCH.**

FEBRUARY 18 THE SUN JOINS VENUS AND NEPTUNE IN PISCES:

As we are plunged into the waters of Pisces, prepare to feel your feelings, and enjoy the gift of unlimited intuition. It is time to embrace your sensitive, creative side. On **2/19** a mystical New Moon in Pisces arrives as the Sun and Moon swim side by side, catching the waves of intuition as well as the awareness of your heart's deepest desires. Since Saturn is still close to the Sun and Moon, there is greater commitment and discipline available. Just 50 minutes after the New Moon Venus, the planet of love, heats up as she moves into fiery Aries **until 3/17**. **A tip:** Venus joins Jupiter on **3/1**, bringing an abundance of opportunity for relationship happiness and a windfall in the creative sphere of our lives. With Venus in Aries, it is time to prioritize what you want and become bolder in sharing your needs. Trade in fear for confidence. This the first time in 12 years that we have had this opportunity; make the most of it.

As you can see, February is a month which brings opportunity, joy, change, big dreams, and release. February is only one of the two months in 2023 that has no retrograde planets, giving us the open space to make major change in our lives. It is time to work on the inner self so our lives will be what we dream of. As I believe, it is time to live the wildest dreams of our ancestors. **In March Saturn will enter Pisces for the first time in 30 years (3/7) and Pluto will enter Aquarius for the first time in 240 years (3/23).** If there is anything I can do to help you prepare for this auspicious time, I am available to provide you a personal astrological update and support you in charting your progress during this once in a lifetime opportunity.

HAVE A FABULOUS FEBRUARY WITH LOVE, JOY, PASSION, AND ABUNDANCE!
