

## GREETINGS:

I hope you are prepared for a dynamic month with changing energy patterns. As the Sun and Mercury begin the month in watery, hyper-feeling Pisces, we will transition into fire, earth and air and get a rush of energy to get things done. With Mars, our planetary source of action and courage “out of bounds” till 3/18, it may be hard for most of us to sit still. With Mercury remaining retrograde until 3/10, plans made before that date may need reviewing before moving forward. We also have 4 super conjunctions this month, Saturn moving into Aquarius for the first time in 30 years (3/21), and the Sun entering Aries at the Spring Equinox (3/19), so plan to use your optimism and find the flow so you will not have a bumpy ride.

## FIRST WEEK OF MARCH:

Venus enters her home sign of Taurus on March 3, running into Saturn as she makes her way to a conjunction with Uranus on March 8. This combination is designed to have us review our relationships and our financial needs with caution and originality. Mercury moves backward into Aquarius on March 4, adjusting our thinking function from feeling to thinking with originality and increases our need to collaborate with those we trust. Also, on 3/8 the Sun on Pisces merges with Neptune, the ruler of Pisces. This is a once a year opportunity for powerful creativity and big dreams. Your intuition will be increased at this time.

## SECOND WEEK OF MARCH:

The Full Moon in Virgo which occurs on March 9, shortly after Venus joins Uranus in Taurus, inspires us to open our hearts and increase our compassion. This is a pattern which urges us to help others and to allow greater self-acceptance rather than perfectionism. This Full Moon brings into opposition the order and perfectionism of Virgo and the deep feeling and sometimes chaos and confusion of Pisces, which is intensified by the Sun’s embrace of Neptune. This is a very creative energy pattern so don’t let it pass without going inward. Practical solutions to long standing problems may appear as the earthy planetary majority put the emphasis on practical action. Mercury moves forward on March 10, after 3 weeks of confusion and disruption. It is time to move forward for the rest of March.

## SECOND HALF OF MARCH:

On March 19, the Sun enters Aries, a time when we celebrate the beginning of the astrological new year, a time which releases our inner pioneer. This is a time to move into new territories and create fresh challenges with strength, boldness and unlimited courage. On March 20 Mars joins Jupiter in Capricorn for a time of expansion and a dose of confidence in our future. This is a time for a great adventure as our enthusiasm can be expressed physically as well as mentally. On March 21 Saturn finally moves out of Capricorn and into Aquarius, giving us a nearly 4-month sample of what we need to be free of our limitations. Take notes, make plans and garner the resources that are necessary for you to become a more authentic version of yourself. This is the first time in 30 years we have experienced this pattern. Many believe it is the second phase of the Aquarian Age emerging. Remember the changes that occurred collectively and personally in the world of the 1960’s, and it may give you a sense of what is coming into manifestation: order out of chaos.

On March 22 the influence of Mars, the ruling planet of Aries, joins with Pluto in Capricorn, a powerful, passionate energy which can take you to places you have never imagined. If you have problems to solve or goals to accomplish, you will have strength and passion at this time. The week of March 20-28 is the

most productive of 2020 so far. Make your plans to maximize your progress. On March 24 we have the New Moon in Aries inviting us to embrace our inner wildness, as well as the ability to conquer our fears. As we use the ability to be decisive and have an uncomplicated focus, we are able to move forward with confidence and clarity. With Mars, the ruler of Aries, in strong aspect to Pluto and Jupiter in Capricorn, the possibility of strong support in accomplishing our goals is highly likely as opportunity arrives on time after much struggle in the past. This is a very healing pattern.

Venus gets busy the last few days of March, being supported by Jupiter in Capricorn on 3/27 and Pluto on 3/31. Life may bring new blessings and opportunities in all areas, especially finances and relationships. A final burst of energy occurs as Mars and Pluto align together on March 31 in freedom loving Aquarius for the first time in 30 years. Get ready to move forward whether you want to or not. If you have been tested in the past 3 years and have developed patience and discipline, this is your time to go and grow.

Enjoy the changes and opportunities in March. If I can help you translate events, astrological trends and/or dreams, I would be honored to help.

WITH JOY, PATIENCE, LOVE, WISDOM AND GRACE,
