

## March 2023 Astrological Outlook

### **GREETINGS:**

I hope you are ready for a roller coaster ride into a new awareness of yourself and your place in the world. I wrote a preview of March 2023 last week. If you missed it or need to review it, you can read it [HERE](#). We are at the threshold of territory unlike any we have experienced in this lifetime. Two powerful outer, slow moving planets (Saturn and Pluto), change signs, and in time we will look backward with 20/20 vision allowing us to see the clear dividing line between what was and what changed.

March begins with the planets of indulgence, Venus and Jupiter embracing in fire sign Aries, a pattern of joy and delight, and maybe a bit of over confidence and impulsivity. On **3/2** Mercury joins Saturn in air sign Aquarius, increasing our mind's orderliness. From **3/2-3/19** mental Mercury swims through watery Pisces and shifts us into intuition and active dreaming, allowing us to think in feelings and images, not words. This is a time to soak up what is going on around you as we will be more intuitive and closer to what is innate. Thereafter, the door to the future opens quickly and the rest of March is never ending change. Here are some of the major themes:

### **MARCH 7: FULL MOON IN VIRGO, FOLLOWED BY SATURN ENTERING PISCES**

The Full Moon in Virgo opposes the Sun in Pisces, shedding light on the need for better boundaries and focusing on the details of our lives. This is a time to find ways to improve habits and review your routines, all of which helps us to evolve in a positive direction. Shortly thereafter Saturn begins a 2.5 year ocean voyage in the deep waters of the last water sign in the zodiac, Pisces, one of two signs that have dual symbols (Gemini is the other), bringing us the opportunity to balance the tension of opposites. Saturn is the planet of form, structure, reason and organization and after nearly 30 years he will again function in the sign of emotional, intuitive, sensitive, shapeless and boundary dissolving fish for the next 2.5 years. It is time to harness your hard working, keen eyed Saturnine energy to build out your personal Piscean ideas, dreams and intentions into something solid and sustainable. **THE SKY IS THE LIMIT!**

## **PERSONAL PLANETS VENUS, MERCURY AND MARS CHANGE SIGNS:**

On **3/16** Venus returns home to Taurus, increasing the need for pleasure, nourishment and peace, encouraging us to seek ease and sensual pleasure. On **3/30** Venus joins Uranus, allowing breakthroughs into our lives, particularly in our use of finances and relationships. This is a perfect end to a high energy month. On **3/19** Mercury moves into fiery Aries until **4/3**. Don't be surprised if you become more direct and impatient with those who don't move as fast as you do. Courage and boldness are expected when Mercury is infused by Aries energy. Finally, Mars leaves Gemini on **3/25** after 6 long months (**8/21/22-3/24/23**) of over thinking, ruminating, and being generally depressed and grumpy. When Mars enters water sign of the home and family, Cancer, it is time to reconnect with others and make yourself comfortable in your home. Enjoy this energy until **5/21** when Mars moves into Leo and a good time will be had by all.

## **SPRING EQUINOX IN ARIES ON MARCH 20: NEW MOON IN ARIES MARCH 21**

Time to enter the fire of Aries as the Sun enters the first sign of the zodiac, joining Mercury and Jupiter. This is a time when passion and ambition intensify. This annual change of seasons occurs just before the New Moon in Aries (**3/21**) and provides some clues about the energy of Spring. There are planets in a bowl pattern between Pluto at 29 degrees of Capricorn (called the hanged man), a fateful change of destiny and Mars at 25 degrees of Gemini. The Moon is in Pisces in behind the Sun (dark of the moon) and joins Neptune. In my opinion this is a time to reconsider your life journey and move toward a magical, creative flow of new life with a strong streak of confidence and courage. With Virgo rising on the Equinox chart, it is time to get busy and tidy up our lives. The New Moon in Aries includes the Sun, Mercury, and Jupiter, a stellium of fiery action energy which gets us going whether we want to or not. It is time to initiate projects while we are inspired to grow with confidence and passion.

## **PLUTO ENTERS AQUARIUS ON MARCH 23: THE BIG UNKNOWN CHALLENGE**

Pluto has an elliptical orbit and yes, he is still a planet. I know he moves with depth and stealth and never fails to make things clear. Years ago, I had a client who had a choice between two work opportunities. She asked me which one she should accept. I told her Pluto is in charge so you will know when he tells you. There was

an interesting result in this case. She had one job at a school in Houston and an opportunity to move to a job in Georgia. The school burned to the ground, and she moved to Georgia. Pluto is dramatic and removes choice as he slowly moves forward and backward. In 2008 Pluto entered Capricorn and for the past 15 years has disrupted capital markets and everything else we can imagine; **HOWEVER**, many of us learned lessons we won't repeat and we are still here and ready to move forward. The last time Pluto was in Aquarius was 1778-1798, so we will know what his assignment was in 20 years. I was told in the 1960's that this was the initiation of the Aquarian Age. I hope so and look forward to the surprising changes it will bring. Pluto brings forceful, deliberate, and thorough change so we will grow beyond our wildest dreams.

***March 2023 is a turning point in all of our lives.*** I, for one, am looking forward to growth and development. This is the time to **GO FOR IT**, and don't look back. **DREAM FIRST, DETAILS LATER.** In that spirit, I am resuming my passion as a landscape consultant and making time to finish my first book, **THE NAN PLAN**. I will be in and out of the office and available for consultations to plan astrological timing, as well as strategizing and brainstorming with you so you can develop with greater success and confidence. I am also fortunate enough to celebrate the birthdays of my 3 granddarlings in March.

**WISHING YOU ADVENTURE, COURAGE, WISDOM, HOPE AND ABUNDANT JOY  
AND GRATITUDE,**

**NAN**
