

GREETINGS:

I am happy to bring the news that there is a harvest of hope to be thankful for this November. One of the things that I am happy about and wish to thank all of you for, is the 47 years that you have supported me in my journey to help you with my combination of astrology, marriage and family therapy, Jungian psychology, trauma and recovery, and my own experience of tools that get us moving forward. After getting fired from my job in 1971 I decided to be a "Leaping Beauty" and follow my calling to help and heal others, myself as well. This November begins my 49th year and I am beyond grateful for the amazing grace of sharing with any and all of you.

LANDSCAPING: Finally, it is cooler and has stopped raining. After a hurricane, a freeze, a wet Spring and a hotter than Hell Summer, it is time to clean up and plant so you can enjoy a season of beauty. Let me know if I can help you plan, implement a design and/or clean up what nature has left for us in our landscapes. Soon, I will have spent 20 years in this fascinating, gratifying profession that allows the right hemisphere of my brain to share my joy and passion with plants and flowers as a healing force of nature.

ASTROLOGICAL HIGHLIGHTS FOR NOVEMBER 2018:

We will have a New Moon in Scorpio on 11/7, following a dynamic shift in energy the first week of November, which brings us a change in focus and the opening of a new chapter in our lives (THANK GOD!). The first 5 days of November finds the Sun in Scorpio moving to an exact triangle with the planet Neptune, particularly powerful in November, as Neptune moves back into forward movement on 11/24. Instead of trying to be all things to all people, it is time to cultivate self-compassion, which leads to genuine compassion in our relationships with others. With this in mind, on 11/6 the North Node of the Moon moves into feeling sign Cancer until 5/4/20. This pattern increases our desire for emotional connection and to find creative space for our self-expression. We may feel like we are losing control as we share our feelings, but remember, feeling leads to healing. The North Node in Cancer encourages us to come out of our shell and show our softer side which will build our confidence, courage and more balance in our relationship life.

The New Moon in Scorpio on 11/7 asks us to be willing to cover what has been underground and bring it into the light for greater peace. This is a time to explore all of our feelings at a deeper level of truth. Since the ruler of Scorpio Pluto is in a supportive position at this time, don't miss the opportunity to reconcile old wounds into healing opportunities.

Mars changes signs from Aquarius to Pisces on 11/15 after aggregating all of us since mid-May. The signs Aquarius, Leo, Scorpio and Taurus will all be especially relieved with this change of sign. Don't be surprised if your aggression takes a vacation till Mars enters its home sign of Aries on 12/31/18 and things get popping once again in 2019. For those who wonder why there has been so much violence in the world in the past 6 months, Mars has fanned the flames of society and crowds have turned into mobs. Let us pray that sanity returns.

Venus moves forward again on 11/16 bringing new equilibrium in our relationship with ourselves as well as others. For many of us, better financial opportunity is just around the corner. On the same day Mercury, the trickster energy goes retrograde until 12/6 for the final time in 2018. Since Mercury is visiting Sagittarius, we are looking deeper into our future plans and how to prepare for success. The subsequent 3 weeks are not great for signing documents, travel, starting new projects. It is time to prepare for uncertainty and change with grace and a sense of humor. This strategy is very important as the most disruptive planet in our Solar System, Uranus, moves backward into fiery, bold Aries on 11/6, allowing us to claim our independence and reawaken our inner hero/warrior. The exhausting 6 months Mars stirred everyone up in his visit to Aquarius with the friction that seemed more frustrating than fulfilling, we have had the opportunity to get clear on what has held us back. On 11/19 Mars and Jupiter form a pattern of friction, tempting us to say yes to things that need to be more carefully considered. Listen to your intuition and see what moves toward you with ease and flow. There will be signs where there are green lights.

Prepare for a weird energy on 11/21 which creates a feeling of anxiety, impulsiveness and boldness. Talk to trusted advisors before you act or speak. On 11/22 the Sun leaves watery Scorpio for fiery, optimistic Sagittarius opening us to go beyond the familiar and encounter new experiences which will add to our discovery of our true self. The Gemini Full Moon of 11/22-23 bringing about a feeling of being full, if not overloaded. Jupiter is active with this Full Moon and so the temptation to overdo is hard to resist. It is time to be extra careful and levelheaded when listening to or transmitting information. Think before you speak is a good idea. Breathe well and help the brain to work more effectively. On 11/24 Neptune moves forward in its home sign of Pisces, unleashing unlimited creativity and compassion for all of us, particularly with those who have planets in Pisces.

From 11/25-27 we have a once every 12 year opportunity to review our good fortune over the past 12 years. Look backward to see how far you have come and forward to where you want to be in 12 more years. The Sun joins Jupiter and then Mercury to give us the faith to move mountains and build our future on an attitude of gratitude.

Wishing you much celebration and relief in November. If I can help you in any way, please let me know. It would be my continuing honor to bring peace into your life.

WISHING YOU GRACE AND GRATITUDE,

NAN
