

November 2021 Astrological Outlook

GREETINGS:

As November begins, the mental energy of Mercury occupying air sign Libra since late August, bumps into Pluto for the final time in 2021 and moves into the deep waters of Scorpio on **November 5th** following the New Moon in Scorpio. We are now ready to release the relationships that no longer serve our needs and do not align with our path of growth. With a majority of planets in fixed signs (Sun, Mercury, Mars, Jupiter, Saturn and Uranus), it is time to go deep and get real about our values and needs. With planets in Scorpio until **November 21st**, and the beginning of a new eclipse cycle at the Full Moon in Taurus on **November 19th**, we are moving into a change in focus, a slow-moving process which will reset our relationship to money, values and resources. It may feel like the year is wrapping up ahead of schedule as the transformational symbol for Scorpio, the Phoenix bird, rises and takes us with him whether we want change or not.

NOVEMBER TRENDS:

NEW MOON IN SCORPIO - NOVEMBER 4th:

The Sun and Moon create a sliver of light, intensified by the presence of Mars and enlightened by the planet Uranus in Taurus, designed to throw us out of balance so our deepest desires can awaken. As we move toward the lunar eclipse Full Moon in Taurus on **November 19th**, we may feel life speeding up in ways expected and unexpected. For the first time in nearly two decades the eclipse cycle occurs in the signs Scorpio and Taurus, with rapid growth and change in our value systems around money, shared resources and a need for honesty, openness and progress in these areas. With Mars occupying the space, anger and frustration may lead to clarity and action as we feel our emotions with greater depth and passion. With Uranus opposing the New Moon and Mars, awareness may seem to come suddenly as what was once hidden is now out in the open.

VENUS MOVES INTO TO CAPRICORN FROM NOVEMBER 5, 2021 – March 6, 2022:

Venus moves into Capricorn for more than a season, increasing our commitment, diligence, and awareness of our value at work or other important endeavors. For five months, instead of the usual one month, we are allowed to think about money with the frugality of a Capricorn.

Expect to review and revise your expectations for your earnings, as well as what you want to spend your money on as your awareness deepens. Mental Mercury occupies savvy Scorpio for the first three weeks of this period which will intensify your research into the reality of your finances.

MARS IN SCORPIO MARCHES FORWARD WITH PASSION:

With Mars spending all of November in the watery depths of Scorpio, passion and commitment increases. As mentioned above, Mars joins the Sun and Moon on **November 4th** and opposes Uranus in Taurus and squares off with Saturn in Aquarius, creating imbalance which can lead to awareness and creative action. On **November 10th** Mars joins Mercury in Scorpio and can cause reactivity, as well as resistance to what is no longer serving us. If you have repressed feelings, this is the time that awareness may open the door to clarity. A buildup of pressure is likely, but communication should be delayed. Make time to discuss your feelings with a trusted source and plan a strategy for sharing your awareness with others. On **November 17th** Mars and Uranus form a tense opposition which invite surprise and confrontation. This may be an emotionally charged period and that may be an understatement. It is a good time to avoid those who you are tempted to overreact to. On **November 29th & 30th**, Mars is part of a big-time energy pattern, forming a water triangle with Neptune in Pisces, along with the Sun joining Mercury and Venus and Neptune in rapport at the same time Mercury and Saturn balance. This is the best time for action and resolution of long-standing conflicts. If possible, delay communication and discussion till month's end.

FULL MOON IN TAURUS WITH PARTIAL LUNAR ECLIPSE:

The Full Moon in Taurus which occurs on **November 19th** is also a partial Lunar Eclipse. This opens a new eclipse cycle balancing the energies of Taurus/Scorpio for the following 18 months. These cycles occur every 18 years, so it would be wise to review your financial goals and needs and see how things have evolved over the past 18 years. This is the time for you to review, revise and update your finances, as well as your values. It is time to release any and all items and goals that no longer serve you. With Venus in a harmony with Uranus, closed doors may open in ways you have not imagined or expected. Jupiter is also involved in this Full Moon, helping us to network, expand our options and boundaries and be especially beneficial for those of us who have moved into or plan to move into new activities or environments. This is a time of great opportunity for those who find wings and dare to leap.

TIME TO LIGHTEN UP AND RELAX AS THE SUN (21st) AND MERCURY (24th) MOVE INTO SAGITTARIUS

As the Sun and Mercury move into joyful, open hearted, optimistic Sagittarius just before Thanksgiving, we can all enjoy a collective sigh as we have navigated the toughest part of 2021 and can look forward to Mars moving into Sagittarius in mid-December. Mystical Neptune goes direct on December 2 and creativity and intuition return in spades as we are in full force forward at year's end. The astrology of November presents significant shifts and opportunities to release the past and create a new path forward as we move with greater awareness into our future.

If I can assist you in your understanding of yourself and your relationships with others, please let me know. This is a time of change and challenge for all of us and 2022 is the third year of a developmental cycle that will not reoccur for 30 years. As the year comes to an end, it is also a good time to get an update on your astrological chart.

WISHING YOU A MEANINGFUL DAY OF THE DEAD, JOYOUS MONTH AND UNLIMITED GRATITUDE FOR OPPORTUNITY TO GROW AND CHANGE,

NAN
